WELD AID AUTOMATION

Vast range of Products are manufactured.

❖ HYDRAULIC PRESSES AND MORE...

Weld Aid Automation, with its hydraulic presses featuring the unmistakable trademark, stand out against its background of its competitors in a key sector for the mechanical industry. Present on market since 1998 with its now historic iron-workers, Punching machines and trimming Bending machines, the company has since

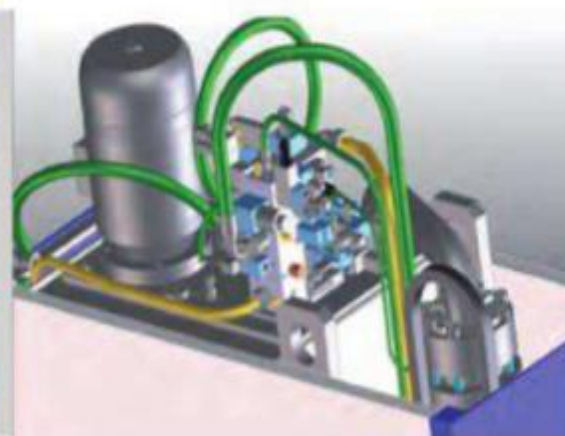

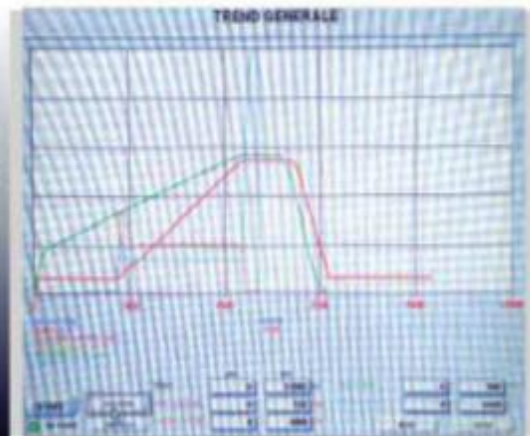

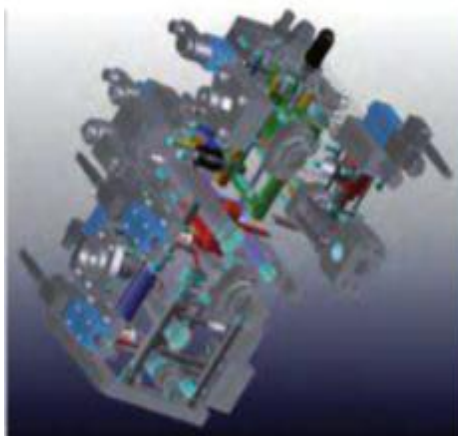

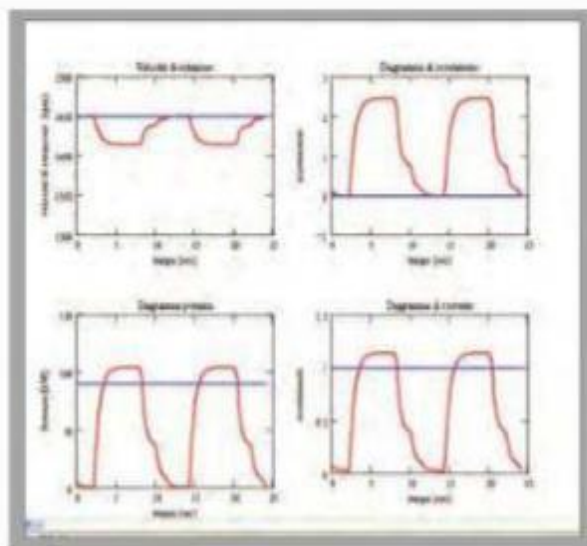

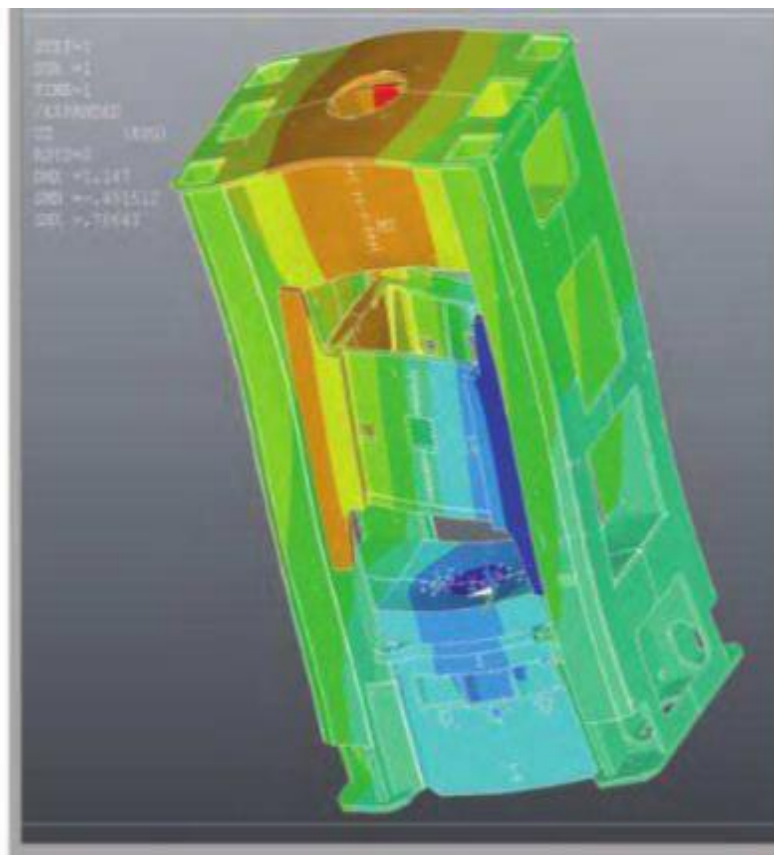

2000 continued to make its contribution in terms of innovation, experience and advanced technology to the field of sheet metal working.

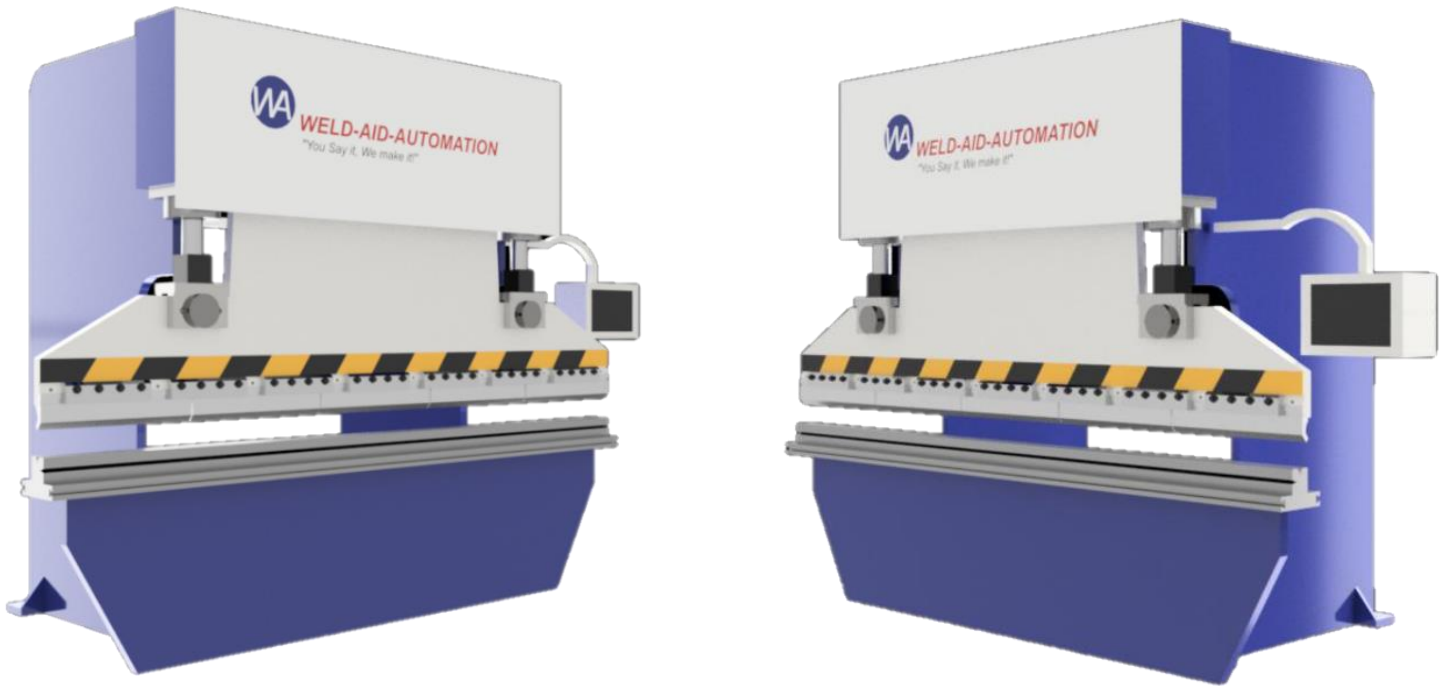

Weld Aid Automation has achieved excellent sales results over the year, becoming a leading figure in the industry, remaining ever faithful to the basic idea of its founder partners and pursuing the increase in technical knowledge within the company and nurturing technical development in hydraulics, electronics and automation.

**AMONGST OUR IDEAS
THERE IS DEFINITELY
THE
RIGHT SOLUTION FOR
YOU.**

X > RESEARCH AND DEVELOPMENT

In order for presses to truly become containers of infinite high-performance solutions, the company's "know-how" must be oriented and finalised towards the innovation of processes and products. Interpretation of the user's needs and the transformation of these into ever more appropriate solutions renders this particular task of the company more important and decisive than ever as far as the result is concerned.

Srl. No.	Details	Description
1	Capacity	80 tons/100tons/250tons/500tons(as per requirement and customization)
2	Model	WAA/HB80
3	Synchronization	Mechanical Type
4	Control	PLC control
5	Bending Details	4mm thickness and 2500 mm length
6	Approach Speed	150 - 200 mm/sec
7	Return Speed	65 mm/sec
8	Motor	7 Hp
9	Gauge	Manual Gouging
10	pump	Dual stage pump
11	Levelling	Auto Levelling
